PROFESSIONAL SUMMARY

Front-End Developer and Software Engineer with six years building enterprise web applications in Vue 3, TypeScript and Tailwind CSS against Laravel REST APIs: ERP platforms, higher-education systems, scheduling and approval workflows, and public-sector websites.

Currently Front-End Team Lead on the Haleta ERP platform at Qelem Meda Technologies, owning module architecture, the shared component library and the review standards the front-end team builds against. Eleven products delivered across the last six years.

MSc in Software Engineering (CGPA 3.97), lecturer in software engineering at Wollo University since 2019, and three peer-reviewed publications including one in IEEE Access.

TECHNICAL SKILLS

Front-end	Vue.js 3 / Composition API • TypeScript • JavaScript (ES6+) • Tailwind CSS • PrimeVue • Pinia • Vue Router • SPA architecture • Component library design • Responsive, mobile-first • Accessibility (WCAG) • Performance optimisation • HTML5 / CSS3
Back-end & data	Laravel • PHP • REST API design & integration • Authentication, roles & permissions • MySQL • PostgreSQL • Relational modelling
Practice	Front-end architecture • Code review • Agile / Scrum • Git, GitHub & GitLab • Vite • Figma hand-off • Technical mentoring
Domains	ERP & business operations • Higher-education systems • Workflow & approval systems • Public-sector web
Languages	English • Amharic

PROFESSIONAL EXPERIENCE

Front-End Developer & Front-End Team Lead | Qelem Meda Technologies — *Jun 2024 – Present*

Addis Ababa, Ethiopia

- Lead front-end development for enterprise web applications and ERP platforms, setting the architecture and conventions the rest of the front-end team builds against.
- Own module boundaries, the shared component library, coding standards and the code-review workflow across a multi-module single-page application.
- Build responsive, accessible interfaces against Laravel REST APIs, with particular attention to the performance of data-heavy tables and dashboards.
- Work in Agile sprints with designers, back-end developers and project stakeholders across the full SDLC, and mentor developers through review.
- Delivered eight products in this stack, from ERP modules to public-facing university and corporate sites.

Stack: Vue 3, TypeScript, Tailwind CSS, PrimeVue, Pinia, Vue Router, Laravel, REST APIs, Git

Founder & Front-End Developer | Moseb Technologies — *2019 – May 2024*

Ethiopia

- Founded and ran the company, taking projects from first client conversation through scoping to delivery while building the front end.
- Built the front end of the Castor Oil Data Management system, covering production records and reporting.
- Developed the IEEE Student Branch website for Kombolcha Institute of Technology, Wollo University, and delivered responsive, cross-browser interfaces integrated with Laravel back ends.

Stack: Vue.js, JavaScript, HTML5, CSS3, Tailwind CSS, Laravel

SELECTED PROJECTS

Haleta ERP haleta.qelemmeda.et — *Live*

Front-End Team Lead — Vue 3, TypeScript, Tailwind CSS, PrimeVue, Pinia, Laravel

- Commercial ERP platform for large organisations: inventory, sales, point of sale, stock operations, reporting and audit, all shipping from one Vue 3 and TypeScript codebase.
- Designed the single-page-application architecture: module boundaries, shared component library and the conventions that keep the twentieth release as maintainable as the first.
- Built data-heavy dashboard and table interfaces with Pinia state shared across modules, behind a server-driven permission model.

Class & Exam Scheduling System schedule.hyperagencyet.com — *Live*

Front-End Developer — Vue 3, TypeScript, Tailwind CSS, Pinia, Vue Router, Laravel

- Academic scheduling platform deployed for Wollo University: class timetabling with room and instructor allocation, teaching-load distribution and automatic conflict detection across a full academic calendar.
- Exam scheduling and invigilation assignment, alongside master-data and course-offering modules.
- Charted dashboards and reports with Excel and PDF export; bilingual English and Amharic throughout, with light and dark themes.
- Configurable for any academic program rather than hard-coded to one institution.

Wollo University Research Repository — *Built, awaiting deployment*

Front-End Developer — Vue.js, Pinia, Laravel, OAuth2 / Passport, MySQL

- Research management system for research documents and student projects, modelled across seven roles from student and advisor to department head and research office.
- Multi-level approval workflow with submission, review, commenting, feedback and status tracking at every stage.
- Document management with upload, version control, format validation and controlled downloads, plus a reporting dashboard.
- Not yet public — a code walkthrough or local demonstration is available on request.

GIZE gize.qmt.et — *Live*

Front-End Developer — Vue.js, Tailwind CSS, Laravel

- Agile project-management tool with hierarchical epics, stories and tasks and story-point estimation.
- Data-dense backlog, workflow and performance-analytics views built as a Vue single-page application, now used company-wide.

Ethiopian Public Service University epsu.edu.et — *Live · Volunteer*

Front-End Developer — Vue.js, TypeScript, Tailwind CSS, Laravel

- Public university website built mobile-first for students, staff and applicants across a wide range of devices and connection speeds.
- Keyboard access, heading structure and colour contrast handled during the build rather than retrofitted afterwards.
- Content maintained by university staff through the CMS without a developer in the loop; designed, built and delivered at no cost.

FURTHER DELIVERY

LyuHub lyuhub.com	Digital identity platform covering portfolio, résumé, digital business card and membership card services.
Wollo University Staff Portal wustaff.edu.et	Staff portal with responsive pages and content management, delivered at no cost.
Corporate & operations sites lacomelza.com · ethioeast.et · hyperagencyet.com · zyodaparking.com	Lacomelza Enterprise, Ethio-East Investment Group, Hyper Agency and Zyoda Parking — multilingual, CMS-driven sites and a parking-operations system, all Vue.js against Laravel back ends.

TEACHING EXPERIENCE

Lecturer | Wollo University — *2022 – Present*
Kombolcha Institute of Technology, School of Software Engineering
Lecture undergraduate software engineering modules and serve on the department's exit exam task force.

Assistant Lecturer | Wollo University — *2019 – 2022*
Kombolcha Institute of Technology, School of Software Engineering
Taught undergraduate classes and lab sessions alongside postgraduate study.

EDUCATION

MSc in Software Engineering | Bahir Dar Institute of Technology — **CGPA 3.97**
2020 – 2022
Research focus: machine-learning approaches to software size and effort estimation.

BSc in Software Engineering | Bahir Dar University — **CGPA 3.90**
2014 – 2019
Best Final Year Project Award for the Ethiopian Heritage Conservation & Preservation System.

PUBLICATIONS

1. COSMIC-Based Early Software Size Estimation Using Deep Learning and Domain-Specific BERT — IEEE Access, 2025
2. COSMIC-Functional Size Classification of Agile Software Development: A Deep Learning Approach — ICT4DA, 2023
3. Predicting Software Maintenance Type, Change Impact and Maintenance Time Using ML Algorithms — ICT4DA, 2022

CERTIFICATIONS & RECOGNITION

- **JavaScript Practical Crash Course** — Udemy, Proper Dot Institute (Mar 2025)
- **Mastering React** — Udemy, Proper Dot Institute (Mar 2025)
- **Certificate of Appreciation** — Wollo University Exit Exam Task Force, Software Engineering (Jan 2024)
- **Certificate of Appreciation** — ICT4DA 2022, for a paper presentation on software maintenance prediction (2022)
- **Best Final Year Project Award** — Bahir Dar University (2019)
