

Samuel Temesgen Yimer

Front-End Developer | Front-End Team Lead

+251 92 122 1326 | samueltemesgen158@gmail.com | linkedin.com/in/samuel-temesgen | github.com/samgit126 | sami-portfolio-gamma.vercel.app | Addis Ababa, Ethiopia

PROFESSIONAL SUMMARY

Front-End Developer and Software Engineer with six years of experience building enterprise web applications with Vue 3, TypeScript and Tailwind CSS on top of Laravel REST APIs. The work has covered ERP platforms, university systems, scheduling and approval workflows, and public sector websites.

Currently Front-End Team Lead on the Haleta ERP platform at Qelem Meda Technologies, responsible for module architecture, the shared component library and the review standards the rest of the front-end team follows. Eleven products delivered over the last six years, several of them still in active commercial use.

Daily work is Vue 3 with the Composition API and TypeScript, styled with Tailwind CSS and PrimeVue and connected to Laravel REST APIs. The same care goes into what users notice, such as responsive layouts, keyboard access and clear loading states, as into what the team notices later: predictable structure, small reviewable changes, and code that is still easy to work with once the deadline has passed.

Before Qelem Meda came five years running Moseb Technologies, a self-founded company, covering both the business side and the front-end work. Alongside all of it, lecturer in software engineering at Wollo University's Kombolcha Institute of Technology since 2019.

The engineering side is backed by research. An MSc in Software Engineering with a CGPA of 3.97, focused on machine learning approaches to software size and effort estimation, produced three peer reviewed papers, one of them in IEEE Access.

CORE COMPETENCIES

Front-end architecture	Module boundaries, shared component libraries, coding standards and a review workflow for multi-module single-page applications, built so the twentieth release is as easy to work with as the first.
Dense, data-first screens	Tables, filters, charts and Excel/PDF export over real institutional data, with Pinia state staying predictable as the number of views grows.
Workflow & permissions	Multi-role approval chains with submission, review, commenting and status tracking, behind server-driven permission models and document version control.
Accessibility & reach	Keyboard access, heading structure and colour contrast handled while building rather than patched afterwards; mobile-first for audiences on mixed devices and slow connections.
Internationalisation	Bilingual English and Amharic interfaces, multilingual CMS-driven sites, and light and dark themes carried across a whole product.
Team leadership	Setting front-end standards, reviewing the team's changes, mentoring developers, and coordinating with back-end developers, designers and stakeholders across the full SDLC.

TECHNICAL SKILLS

Front-end	Vue.js 3 / Composition API • TypeScript • JavaScript (ES6+) • Tailwind CSS • PrimeVue • Pinia • Vue Router • SPA architecture • Component library design • Responsive, mobile-first design • Accessibility (WCAG) • Performance optimisation • HTML5 / CSS3
Back-end & data	Laravel • PHP • REST API design & integration • Authentication, roles & permissions • OAuth2 / Passport • MySQL • PostgreSQL • Relational modelling

Practice	Front-end architecture • Code review • Agile / Scrum • Git, GitHub & GitLab • Vite • Figma hand-off • Requirements & SDLC collaboration • Technical mentoring
Domains	ERP & business operations • Higher-education systems • Research administration • Academic scheduling & workload • Workflow & approval systems • Public-sector web

PROFESSIONAL EXPERIENCE

Front-End Developer & Front-End Team Lead | Qelem Meda Technologies

Jun 2024 – Present

Addis Ababa, Ethiopia

Lead front-end development for enterprise-grade web applications and ERP platforms, while setting the architecture and standards the front-end team works to.

- Lead front-end development for enterprise web applications and ERP platforms using Vue 3, TypeScript and Tailwind CSS.
- Serve as Front-End Team Lead on Haleta ERP, owning module architecture, the shared component library, development standards and cross-team coordination.
- Define and enforce the code-review workflow for the front-end team, and mentor developers through review.
- Build responsive, accessible interfaces against Laravel REST APIs, with particular attention to the performance of data-heavy tables and dashboards.
- Collaborate with designers, back-end developers and project stakeholders across the full SDLC, working in Agile sprints.
- Delivered eight products in this stack, from ERP modules to public-facing university and corporate sites.

Stack: Vue 3, TypeScript, Tailwind CSS, PrimeVue, Pinia, Vue Router, Laravel, REST APIs, Git

Founder & Front-End Developer | Moseb Technologies

2019 – May 2024

Ethiopia

Co-founded and ran Moseb Technologies as a self-started company, taking projects from the first client conversation through to delivery while building the front end.

- Founded and ran the business, handling client relationships, scoping, estimation and delivery.
- Built the front end of the Castor Oil Data Management system, covering production records and reporting.
- Developed the IEEE Student Branch website for Kombolcha Institute of Technology, Wollo University.
- Developed responsive, cross-browser interfaces and integrated them with Laravel back ends.
- Handled the full delivery cycle single-handed on smaller engagements, from requirements through deployment.

Stack: Vue.js, JavaScript, HTML5, CSS3, Tailwind CSS, Laravel

TEACHING EXPERIENCE

Lecturer | Wollo University

2022 – Present

Kombolcha Institute of Technology, School of Software Engineering

- Lecture undergraduate software engineering modules.
- Serve on the department's exit exam task force, contributing to assessment design and review.
- Supervise student projects and advise on software design and implementation practice.

Assistant Lecturer | Wollo University

2019 – 2022

Kombolcha Institute of Technology, School of Software Engineering

- Taught undergraduate classes and ran laboratory sessions alongside postgraduate study.
- Supported course delivery, assessment and student consultation across the software engineering curriculum.

PROJECTS

Haleta ERP haleta.qelemmeda.et

Live

Role: Front-End Team Lead — Tech: Vue 3, TypeScript, Tailwind CSS, PrimeVue, Pinia, Laravel

- Commercial ERP platform built for large organisations, covering inventory management, sales, point of sale, stock operations, reporting and audit. All of it ships from one Vue 3 and TypeScript codebase.
- Designed the single-page-application architecture: module boundaries, the shared component library and the conventions that keep the twentieth release as maintainable as the first.
- Built data-heavy dashboard and table interfaces with Pinia state shared across modules, behind a server-driven permission model.
- Set the front-end coding standards and the review workflow the team works to.
- Coordinate with back-end developers and stakeholders to ship each module at scale.

Class & Exam Scheduling System

Deployed; public URL offline

Role: Front-End Developer — Tech: Vue 3, TypeScript, Tailwind CSS, Pinia, Vue Router, Laravel

- Academic scheduling and workload platform deployed for Wollo University: class timetabling with room and instructor allocation, teaching-load distribution and automatic conflict detection across a full academic calendar.
- Exam scheduling and invigilation assignment, alongside master-data and course-offering modules, behind a server-driven permission model.
- Data-heavy dashboards and charted reports with Excel and PDF export.
- Bilingual English and Amharic throughout, with light and dark themes.
- Pinia stores keep scheduling state shared across modules without the views slowing down.
- Configurable for any academic program rather than hard-coded to one institution.
- The public deployment is currently offline; a walkthrough is available on request.

Wollo University Research Repository

Built, awaiting deployment

Role: Front-End Developer — Tech: Vue.js, Pinia, Laravel, OAuth2 / Passport, MySQL

- Research management system covering research documents, student projects and the academic workflow around them, modelled across seven roles: admin, department head, project coordinator, advisor, student, research office and researcher.
- Multi-level approval workflow with submission, review, commenting, feedback and status tracking at every stage.
- Document management with upload, version control, format validation and controlled downloads.
- Announcements module plus a dashboard reporting user statistics, document metrics and activity.
- Authentication and role assignment through OAuth2 / Laravel Passport against a MySQL schema.
- The system is not yet public, so a code walkthrough or a local demonstration is available on request.

GIZE gize.qmt.et

Live

Role: Front-End Developer — Tech: Vue.js, Tailwind CSS, Laravel

- Internal agile project-management tool with hierarchical epics, stories and tasks.
- Story-point-based estimation and tracking across the backlog.
- Workflow management, dashboards and performance analytics, now used company-wide.
- Data-dense backlog and dashboard views built as a Vue single-page application.

Ethiopian Public Service University epsu.edu.et

Live · Volunteer

Role: Front-End Developer — Tech: Vue.js, TypeScript, Tailwind CSS, Laravel

- Public university website built mobile-first for students, staff and applicants across a wide range of devices and connection speeds.
- Keyboard access, heading structure and colour contrast handled during the build rather than retrofitted afterwards.
- Front-end modules integrated with back-end APIs for dynamic content delivery.
- Content maintained by university staff through the CMS without a developer in the loop.
- Designed, built and delivered at no cost as a contribution to public higher education in Ethiopia.

LyuHub lyuhub.com — *Live*

Role: Front-End Developer — Tech: Vue.js, Tailwind CSS, PrimeVue, Laravel

- Digital identity platform covering portfolio, résumé, digital business card and membership card services.
- Built responsive interfaces for every service in the product suite.
- Implemented a shared component set integrated cleanly with back-end APIs.

Wollo University Staff Portal wustaff.edu.et — *Live · Volunteer*

Role: Front-End Developer — Tech: Vue.js, TypeScript, Tailwind CSS, Laravel

- University staff portal with responsive pages backed by content management.
- Delivered at no cost alongside the Ethiopian Public Service University site.

Lacomelza Enterprise lacomelza.com — *Live*

Role: Front-End Developer — Tech: Vue.js, TypeScript, Tailwind CSS, Laravel

- Corporate site for an Ethiopian construction, engineering and manufacturing enterprise, covering business units, projects, careers and news.
- Responsive layouts, multilingual support and a searchable content structure.

Ethio-East Investment Group ethioeast.et — *Live*

Role: Front-End Developer — Tech: Vue.js, Tailwind CSS, Laravel

- Multilingual corporate website with dynamic content management.
- Localisation support, with product and service content maintained by the client.

Hyper Agency — *Delivered; site currently offline*

Role: Front-End Developer — Tech: Vue.js, Tailwind CSS, Laravel

- Corporate agency website with a modern, component-driven interface.
- Developed the responsive UI components and the site's visual system, working directly with designers and back-end developers.

Zyoda Parking zyodaparking.com — *Live*

Role: Full-Stack Developer — Tech: Vue.js, Tailwind CSS, Laravel

- Parking management system covering operations, vehicle tracking and administration.
- Worked across the stack, from Laravel endpoints through to the Vue front end.

OPEN-SOURCE & PERSONAL REPOSITORIES

Student Internship Management System samgit126/Student-Internship-Management-system	Manages student internship placements, supervisors and reporting end to end. Laravel · Vue.js · Tailwind CSS
IEEE Student Branch samgit126/IEEE-Student-Branch	Website built for the KIOT Wollo University IEEE student branch. JavaScript · Laravel
Castor Oil Data Management samgit126/Castor-oil-data-management	Data management system for castor oil production records and reporting. Vue.js · Tailwind CSS · Laravel
Admin Panel samgit126/Admin-Panel	A simple, lightweight and reusable admin panel starter. Laravel · Vue.js · Tailwind CSS
Ethio-East Website samgit126/ethio-east-website	The fully dynamic company website built for Ethio-East business group. Vue.js · Laravel
Payroll samgit126/Payroll	Payroll management application with employee and salary records. PHP · Laravel

EDUCATION

MSc in Software Engineering | Bahir Dar Institute of Technology — **CGPA 3.97**

2020 – 2022

Research focus: machine-learning approaches to software size and effort estimation.

BSc in Software Engineering | Bahir Dar University — **CGPA 3.90**

2014 – 2019

Best Final Year Project Award for the Ethiopian Heritage Conservation & Preservation System.

PUBLICATIONS

1. **COSMIC-Based Early Software Size Estimation Using Deep Learning and Domain-Specific BERT** *2025*

IEEE Access • *Journal*

A deep-learning approach to estimating COSMIC functional size from early requirements text, using a domain-specific BERT model to reduce dependence on manual measurement.

2. **COSMIC-Functional Size Classification of Agile Software Development: A Deep Learning Approach** *2023*

ICT4DA • *Conference*

Classifies the COSMIC functional size of agile user stories with deep learning, supporting story-point estimation earlier in the sprint cycle.

3. **Predicting Software Maintenance Type, Change Impact and Maintenance Time Using ML Algorithms** *2022*

ICT4DA • *Conference*

Machine-learning models that predict maintenance type, change impact and expected maintenance effort from historical change records.

CERTIFICATIONS & RECOGNITION

- **JavaScript Practical Crash Course** (Udemy, Proper Dot Institute, Mar 2025)
- **Mastering React** (Udemy, Proper Dot Institute, Mar 2025)
- **Certificate of Appreciation** (Wollo University Exit Exam Task Force, Software Engineering, Jan 2024)
- **Certificate of Appreciation** (ICT4DA 2022, for a paper presentation on software maintenance prediction, 2022)
- **Best Final Year Project Award** (Bahir Dar University, 2019)

ADDITIONAL INFORMATION

Languages	English (professional working proficiency) • Amharic (native)
Location	Addis Ababa, Ethiopia. Available on site, hybrid or remote.
Code	Public repositories at github.com/samgit126; commercial work is in private repositories on the company GitLab and can be walked through on request.
References	Available on request.
