Samuel Temesgen Yimer

Senior Front-End Engineer · Vue 3 / TypeScript · Front-End Team Lead

+251 92 122 1326 | samueltemesgen158@gmail.com | linkedin.com/in/samuel-temesgen | github.com/samgit126 | sami-portfolio-gamma.vercel.app | Addis Ababa, Ethiopia

SUMMARY

Front-end engineer with six years shipping enterprise web applications in Vue.js, TypeScript and Tailwind CSS on Laravel REST APIs, currently leading the front end of a commercial ERP platform. Eleven products delivered across ERP, higher education and public sector, including a multi-module single-page application whose architecture, component library and review process are mine. MSc in Software Engineering (CGPA 3.97) with three peer-reviewed IEEE papers on machine learning for software estimation. Remote-ready: UTC+3, overlapping European and US East Coast working hours.

TECHNICAL SKILLS

Vue.js (2 & 3, Composition API)	6+ yrs	Primary framework since 2019; Vue 3 + TypeScript since 2024
JavaScript (ES6+), HTML5, CSS3	7 yrs	Every project, 2019 to date
TypeScript	2+ yrs	Strict TS across Haleta ERP and all current products
Tailwind CSS	4+ yrs	Design systems and component libraries
PrimeVue, Pinia, Vue Router, Vite	2–3 yrs	Data tables, shared state, SPA routing, builds
Laravel & PHP, REST API design	5+ yrs	Full-stack on smaller products; API integration on all
MySQL, PostgreSQL	6 yrs	Relational modelling, reporting queries
Accessibility (WCAG), performance	4+ yrs	Keyboard, contrast, heading order; Lighthouse-driven tuning
Git, GitHub, GitLab, code review, Agile/Scrum	7 yrs	Team lead on review workflow since 2024
Python, scikit-learn, deep learning / BERT	3 yrs	MSc research and the three published papers

EXPERIENCE

Front-End Developer & Front-End Team Lead | Qelem Meda Technologies

Jun 2024 – Present

Addis Ababa, Ethiopia • Vue 3, TypeScript, Tailwind CSS, PrimeVue, Pinia, Vue Router, Laravel, REST APIs, Git

- Lead the front end of Haleta ERP, a multi-module Vue 3 + TypeScript single-page application covering inventory, sales, point of sale, stock, reporting and audit, shipped from one codebase.
- Own the front-end architecture: module boundaries, shared component library, coding standards and the review workflow a team of front-end developers works to; mentor through review.
- Built the data-heavy table and dashboard layer (filtering, pagination, export) with Pinia state shared across modules, against a server-driven permission model.
- Delivered eight further products in the same stack, from an academic scheduling system with conflict detection to public-facing university and corporate sites.
- Work in Agile sprints with designers, Laravel back-end developers and stakeholders across the full SDLC.

Founder & Front-End Developer | Moseb Technologies

2019 – May 2024

Ethiopia • Vue.js, JavaScript, HTML5, CSS3, Tailwind CSS, Laravel

- Founded and ran a small software company for five years: client relationships, scoping, estimation and delivery, plus the front-end build.
- Built the Castor Oil Data Management system (production records and reporting) and the IEEE Student Branch site for Kombolcha Institute of Technology.
- Delivered responsive, cross-browser Vue.js interfaces integrated with Laravel back ends, often as the sole engineer from requirements to deployment.

SELECTED PROJECTS

Haleta ERP *Front-End Team Lead*	Commercial ERP for large organisations; SPA architecture, design system, data-heavy dashboards.
Class & Exam Scheduling System *Front-End Developer*	Timetabling, room/instructor allocation and conflict detection for Wollo University; bilingual EN/AM; public URL currently offline, demo on request.

Wollo University Research Repository *Front-End Developer*	Research-administration workflow across seven roles with approvals, versioned documents and a reporting dashboard; OAuth2/Passport.
Ethiopian Public Service University *Front-End Developer (volunteer)*	Mobile-first, CMS-driven public university site built and delivered at no cost.
GIZE *Front-End Developer*	Agile project-management tool with epics, stories, story points and analytics.
LyuHub *Front-End Developer*	Digital identity platform: portfolio, résumé, business card and membership card services.

EDUCATION

- **MSc in Software Engineering**, Bahir Dar Institute of Technology, 2020 – 2022 • **CGPA 3.97** • Research focus: machine-learning approaches to software size and effort estimation.
- **BSc in Software Engineering**, Bahir Dar University, 2014 – 2019 • **CGPA 3.90** • Best Final Year Project Award for the Ethiopian Heritage Conservation & Preservation System.

PUBLICATIONS

- COSMIC-Based Early Software Size Estimation Using Deep Learning and Domain-Specific BERT. *IEEE Access*, 2025.
- COSMIC-Functional Size Classification of Agile Software Development: A Deep Learning Approach. *ICT4DA*, 2023.
- Predicting Software Maintenance Type, Change Impact and Maintenance Time Using ML Algorithms. *ICT4DA*, 2022.

ADDITIONAL

Teaching	Lecturer in Software Engineering, Wollo University (Kombolcha Institute of Technology), 2019 to date; exit-exam task force.
Open source	github.com/samgit126: internship management, admin panel starter, payroll and data-management systems in Laravel + Vue.
Languages	English (professional working proficiency) • Amharic (native)
Availability	Remote, UTC+3, with daily overlap for European and US East Coast teams. Open to contract and part-time engagements alongside the current lead role.
